Recognizing the importance of safety, we are interested in the book application of hazard and risk analysis to the petroleum petrochemical and chemical industries. The book aims to provide a comprehensive guide on the application of HAZOP (Hazard and Operability) studies. It explains the methodology, benefits, and application of HAZOP studies in the petroleum, petrochemical, and chemical industries. The book also discusses the integration of HAZOP with other safety review methods and the importance of continuous improvement in safety management. Overall, the book is a valuable resource for engineers, managers, and safety professionals to enhance safety practices and reduce risks in the petrochemical sector.
